BI 2	title	Trusted connection paths through forums created in a given timeframe
BI 3 BI 4 BI 5 BI 6 BI 7 BI 8 BI 9 BI 10 BI 11 BI 12 BI 13 BI 14 BI 15	pattern	Enumerate all shortest paths on knows edges from person1 to person2. For each edge on the path, calculate a weight based on interactions between the pair of Persons (both ways), and the sum of these weights determine the total weight of each path, id = \$person1!d
BI 16 BI 17		\$start <= creationDate & creationDate <= \$end \$start <= creationDate <= \$end
BI 18 BI 19 BI 20 BI 21 BI 22 BI 23 BI 24 BI 25	desc.	Given two Persons, find all (unweighted) shortest paths between these two Persons, in the subgraph induced by the knows relationship. Then, for each path calculate a weight. The nodes in the path are Persons, and the weight of a path is the sum of weights between every pair of consecutive Person nodes in the path. The weight for a pair of Persons is calculated based on their interactions: • Every direct reply (by one of the Persons) to a Post (by the other Person) contributes 1.0. • Every direct reply (by one of the Persons) to a Comment (by the other Person) contributes 0.5. Only consider Messages that were created in a Forum that was created within the timeframe [startDate, endDate]. Note that for Comments, the containing Forum is that of the Post that the comment (transitively) replies to. Return all paths with the Person ids ordered by their weights descending.
	params	1 person1Id 64-bit Integer 2 person2Id 64-bit Integer 3 startDate Date 4 endDate Date
	result	person.id 64-bit Integer[] R Identifiers representing an ordered sequence of the Persons in the path weight weight 64-bit Double R
	sort	1 weight ↓ The order of paths with the same weight is unspecified 2 personIds ↑ The ids in the paths are used for lexicographical sorting
